PROFILE

Second-year B.Tech Computer Science student working toward a career in software engineering and applied machine learning, with a first-year CGPA of 9.55. Comfortable across the full workflow of a small website project: backend and frontend of the website in a good workflow and I'm good with AI tools a little bit so can work with them a little well. Seeking an internship where I can contribute to software problems and learn from an engineering team.

EDUCATION

B.Tech, Computer Science and Engineering

2025 - 2029

Pimpri Chinchwad University (PCU), Pune

First Year CGPA: 9.55 / 10

Relevant coursework: Object-Oriented Programming (C++), Data Structures, Discrete Mathematics, Logic Building, python.

Higher Secondary (XII) and Secondary (X), CBSE

Completed 2024

Shri Guru Tegh Bahadur Academy, Ratlam

Class XII: 75% | Class X: 85%

PROJECTS

Carbon footprint website:

Python, scikit-learn, Google Colab

- It serves as a **Carbon Footprint Calculator/Tracker**, typically designed to help users track, calculate, or analyze greenhouse gas emissions (such as daily transport, electricity usage, waste, or travel). Curated and cleaned a complex lifestyle dataset, handling missing values, inconsistent categories and class imbalance before training.
- The /login endpoint indicates user authentication functionality, allowing individual users to maintain personalized dashboard history, save calculations, or track carbon reduction progress over time. Developed and documented the work in Google Colab for reproducible, environment-consistent execution.

AI-Driven Unified Data Platform for Oceanographic, Fisheries, and Molecular Biodiversity Insights:

- It brings Oceanography (water temperature, salinity, currents), Fisheries (fish counts, otolith bone shapes), and Molecular Biodiversity (eDNA water samples) into a single screen.
- Allows marine researchers on ships at sea to record sample data offline without losing records.
- Uses AI to instantly identify fish species from photos of ear-bones and seawater DNA sequences, saving weeks of manual laboratory effort.

TECHNICAL SKILLS

Languages Python (primary), C++, C

ML AI ethics

Tools Google Colab, Jupyter Notebook, Git (basic), Claude AI for code review and logic optimisation

Concepts Object-oriented programming, data structures, algorithm analysis

Learning now Agentic AI systems, deep learning fundamentals

CERTIFICATIONS&COURSES

Python

Completed

Complete Python(primary)course —linkdin

Web course

Complete web development course –Linkdin,Corsera

ADDITIONALINFORMATION

Languages: English, Hindi,German,Bangali(little bit),Japanese(basic)

Interests: Applied AI in web and software, competitive programming practice,Ai for personnel agent of specific company
